## TO THE RECRUITMENT

I am writing about the position that you have available; as I believe, my skills and attributes would be fit for the role. I am currently studying a Bachelor's degree, and as you can see, I have studied almost everything that is required to be able to fulfil the position.

I am looking for a role where I can be of service to the organization. I believe that I will be able to add value simply because of my ability to take in information and learn quickly. My current situation is also an interesting one, as I have Cerebral Palsy, and am confined to a wheelchair I also have verbal communication barriers. However, to me this is an advantage. Because of these barriers, I am able to double focus on my work but because of my speech impediment, I have been unable to apply for jobs using the traditional methods, such as taking phone calls resulting in work progressions being limited.

This however has not prevented me from applying, as I am very driven. My barriers have allowed me to grow in other areas of senses and that includes an eye for detail. I believe, if I was given the opportunity, and trained, I will be a gun in the company. With my ability to spot problems along with my experience and educational background, it would be beneficial to the organization if I were in it.

Moreover, I am community driven and am willing to become a contributing member of society. This is important to me, as I can be an inspiration to others. It would also bring a positive outlook to the company.

As you can see from my resume, I have worked before within the industry, so I do have experience. I will need some assistance with setting up but I have the full support Wise employment to help me with anything I need.

If you have any work from home opportunities I would definitely also be interested in those as I am already set up at home for work. Currently I am doing my Bachelor of Information Technology at University of Western Sydney – Campbelltown Campus. Whilst I continue to update my skills through education, employment is my top priority and I am able to be flexible with my studies around work requirements.

If I am successful in the role, and a further interview is required please contact me via email, so that a zoom can be organized, as I would like to have the opportunity for my reference from Wise to be present. Most of the interview will probably be done via typing so that you will be able to understand me properly.

Therefore, I am looking forward to meeting with you.

My email address is [pbowman5@bigpond.com](mailto:pbowman5@bigpond.com) and my employment provider's number is on the left should you want to speak with her as I am in regular contact with her for my employment journey.

Kind regards

Paul Bowman
